

CONTENTS

	Page No.
1. Introduction	1
1.1 Types of <i>C. botulinum</i>	1
1.2 Background to VP and MAP	1
1.3 Scope	2
1.4 Shelf-life categories	2
1.5 Storage of at <3°C	3
1.6 Risks from other organisms	3
1.7 Guidance on relative risks of VP and MAP chilled foods	3
1.8 Sous-vide products	4
2. Key points of good manufacturing practice for VP and MAP chilled foods	5
3. Food preservation	7
3.1 Controlling factors	7
3.2 Heat treatment	8
3.3 pH	8
3.4 Salt content	9
3.5 Water activity (A_w)	9
3.6 Challenge testing	10
3.7 Other preservatives	14
4. Raw materials	17
4.1 Summary	17
4.2 Introduction	17
4.3 Sourcing of raw materials	18
4.4 Transport and receipt	19
4.5 Storage	19
5. Manufacturing process	20
5.1 Summary	20
5.2 Introduction	20
5.3 Hygiene	21
5.4 Preparation and processing	22
5.5 Temperature control	25

The manufacture of vacuum and modified atmosphere packaged chilled foods

6.	Packaging	27
6.1	Summary	27
6.2	Introduction	27
6.3	Vacuum and gas flushing techniques	28
6.4	VP and MAP materials	29
6.5	Seal integrity	29
6.6	Gas analysis	30
6.7	Labelling	31
7.	Distribution and end use	32
7.1	Summary	32
7.2	Introduction	33
7.3	Temperature	33
7.4	Labelling	33
7.5	End use	34
7.6	Product recall	34
8.	Storage-life and shelf-life considerations	35
8.1	Summary	35
8.2	Introduction	36
8.3	Storage-life and shelf-life and risk from psychrotrophic <i>C. botulinum</i>	36
8.4	Shelf-life and risk from organisms other than <i>C. botulinum</i>	37
9	Trouble shooting	38
9.1	Introduction	38
9.2	Examples	38
10.	References and additional reading	40
11.	Glossary of terms	42
	Appendix 1: Microbiological safety issues	45
	Appendix 2: Risk categories of VP and MAP foods	50
	Appendix 3: Legislative issues	53
