

LIST OF CONTENTS

	Page
1. INTRODUCTION	1
2. POUCH PERFORMANCE AND SPECIFICATION	2
2.1 Film selection	2
2.1.1 Laminate film specification	3
2.1.2 Laminate film for form-fill-seal application	4
2.1.3 Pre-made pouch specification	4
2.2 Packaging and delivery	6
2.2.1 Pre-made pouches	6
2.2.2 Reel supplied film	6
2.3 Storage and handling	7
2.4 Other considerations	7
2.5 Quality assurance checks - production of pouches	8
2.6 Packaging regulations	8
2.7 Proving and commissioning packaging material suppliers	8
3. FILLING TECHNIQUES	10
3.1 Pre-conditioning	10
3.2 Quality assurance checks – filling of pouches	10
3.3 Pouch loading	11
3.4 Pouch coding	11
3.5 Pouch opening	11
3.6 Control of filled weight and pack thickness	11
3.6.1 Holding time prior to filling	12
3.6.2 Hot filling	12
3.6.3 Ambient filling	12
3.6.4 Chilled and frozen filling	13
3.7 Prevention of contamination in seal area	13
3.8 Entrapped air and headspace	14

4. POUCH SEALING	15
4.1 Sealing conditions	15
4.2 Seal types	16
4.2.1 Heat sealing	16
4.2.2 Ultrasonic sealing	18
4.3 Quality assurance checks - checking of closing seal prior to retorting	18
5. LOADING OF POUCHES ONTO RETORT RACKING OR PACK HOLDING SYSTEM	20
5.1 Holding time prior to retorting	20
5.2 Reconstitution and rehydration	21
5.3 Holding environment	21
5.4 Product identification during holding	21
5.5 Initial temperature for retorting	21
5.6 Tray design and stacking considerations	22
5.7 Orientation and positioning of pouches	23
5.8 Handling and loading the retort	24
6. HEAT PROCESS REQUIREMENTS	26
6.1 Establishment of the scheduled heat process	26
6.1.1 Consideration of degree of lethal heat required to achieve commercial sterility	26
6.1.2 Consideration of the degree of lethal heat required for pasteurised products	27
6.1.3 Consideration of the degree of lethal heat required for REPFEDs	27
6.2 Establishment of heat distribution throughout the heating vessel (retort)	28
6.3 Determination of heat penetration within the product	28
6.4 Production heat process trials	30
6.4.1 Heat processing equipment and instrumentation	31
6.4.2 Services to heat process vessel	31
6.4.3 Temperature measurement	32
6.4.4 Heat process control	32
6.4.5 Overpressure control	32
6.4.6 Circulation of heat transfer medium	34
6.4.7 Heat process records	34
6.4.8 Unloading the retort	35

6.5	Post-process handling of retorted pouches	36
6.5.1	Handling	36
6.5.2	Drying	37
6.6	Quality assurance checks - post processing	38
7.	OUTER PACKAGING	39
7.1	Transit packaging	39
7.2	Conditions during transit packaging	40
8.	GLOSSARY OF TERMS	41
9.	REFERENCES	43
	APPENDICES	45
Appendix I	Film structures	47
Appendix II	Legislation requirements	49
Appendix III	Compression burst test	51
Appendix IV	Burst test	53
Appendix V	Measurement of sealing conditions	55
Appendix VI	Measurement of headspace air content (volume)	59
Appendix VII	Dye penetration test	61
Appendix VIII	Pouch defects	63
