

We create what captivates

## BIBLIOGRAPHY OF THE SPEAKER: FABIO CAMPANILE

Fabio Campanile has been working in the field of flavour delivery systems for the past six years at Quest International R&D centre in the Netherlands. He currently manages a group in R&D responsible for the delivery of innovation in this specific field.

Throughout his career at Quest International he has been looking at various aspects including research into material functionality and encapsulation techniques, product design, development of related production processes and the application of delivery systems. He graduated as a Chemical Engineer, and later gained a PhD degree in Chemical Engineering, specialising in process and polymer technology, and recently an MBA degree.
